State Environmental Quality Review Negative Declaration of Type I Action

Project Number: None

Date: October 18, 2023

This Notice is issued pursuant to Part 617 of the implementing regulations pertaining to Article 8 (State Environmental Quality Review Act) of the Environmental Conservation Law.

Nature of action. An Ordinance authorizing issuance of \$19,500,000 serial bonds to finance the reconstruction of a new parking garage on Water Street with an estimated maximum cost of \$26,500,000. \$7,000,000 of which will be funded by allocation of American Rescue Plan Act Funds and grant funds made available from the State of New York and the balance by the issuance of bonds in the principal amount not to exceed \$19,500,000.

Findings. The City of Binghamton City Council has determined that the proposed action described above is a Type I action pursuant to the New York State Environmental Quality Review Act, because the action is substantially contiguous to a State & National Register Historic District. Council finds no significant adverse environmental impact because the funded project involves the reconstruction of a public parking ramp on a site and within the footprint of a previously existing parking garage which had occupied the space for over 40 years. There is no significant change in the use or intensity of use of the land, and no expansion beyond the original footprint. Moreover, the proposed design of the garage and site was approved by both the Planning Commission and the Commission on Architecture and Urban Design, the latter being the City's historic preservation board. Both agencies found no significant environmental impacts and issued Negative Declarations under SEQRA.
