This proposal would require the City Council to provide information on upcoming votes regarding new or changes to legislation. Each party included above shall provide a post to either a traditional website or popular social media pages (FB, X, etc), a copy or link to the full RL bring voted on minimum 48hr before the vote. If these requirements are not met, they will be required to abstain from the vote. If changes are made less the 48hrs before a vote, that vote will be pushed to the next meeting minimum of 48hrs after the changes, and the process would be started over. In addition, each city council member will be responsible for posting the video of the previous meeting 24hrs after it conclusion.

While I understand this information is mostly available currently, most citizens have no idea it's there or where to look. This RL would be at no additional expense to the taxpayer, since most already have and use a campaign website or social media page the infrastructure is there, and posting links for the legislation and meetings will take a very minimal amount of time.

The purpose of the legislation is to get more citizens involved in city government, by making it as accessible as possible. The more people that are informed and active in the city, the better it is for everyone. This would make our elected officials responsible for providing that information to their constituency.

Proposed Title:

A resolution authorizing the acceptance of a tower viewer from the Broome County Naturalist Club

Executive Summary (Explain why legislation is necessary):

In coordination with Cornell Cooperative Extension, the Broome County Environmental Management Council, and the City of Binghamton, the Broome County Naturalist Club applied for and received a \$5,000 Klee Foundation Grant to purchase a tower viewer to be installed on the 434 Greenway. In order to have the funds released, the Klee Foundation first requires acceptance of the donation by City Council

Effective Date (if applicable):

Expedition requested for this RL? Yes No

Please explain why expedition is necessary:

Expedition would allow the Broome County Naturalist Club to accept the funds from the Klee Foundation and order the viewer, which has a 3-4 week lead time for delivery. That would allow ample time for installation in coordination with City of Binghamton Parks and Recreation so the viewer could be operational this Fall.

Subject: Status of Klee Foundation Micro-Grant Application

Good afternoon, Ryan –

I hope all's well!

We wrapped up our Micro-Grant reviews last week and I'm happy to share that **the Klee Foundation approved a Community Changemaker Micro-Grant in the amount of \$5,000 for the Naturalists Club of Broome County toward the purchase of the Two Rivers Greenway Wildlife Viewing Scope. [Congratulations!](#)**

We understand that the project will require approval from Binghamton City Council, therefore the funding is contingent on that approval. Once that has been confirmed, our grant funds can be released.

You will receive your formal award notification and information regarding the Grant Agreement and follow up components shortly. If you have any questions, please don't hesitate to reach out.

Sending best wishes for the project. Can't wait to see people enjoying the views!

RESOLUTION DECLARING EMERGENCY

WHEREAS, during the August 9, 2024 wet weather event, employees of the Binghamton-Johnson City Joint Sewage Plant discovered an unforeseen penetration by a threaded rod into an electrical conduit of Duct Bank BB1A which rod has damaged the outer jacket of a fiber optic cable integral to the CN Biological Aerated Filtration (BAF) Complex Control System, and has caused the lower east wall of the BAF Blower Building (Building 18) to become energized during wet weather conditions, posing an electrical shock hazard to Plant personnel; and

WHEREAS, as a result, a significant portion of the Plant's sewage treatment operations are in jeopardy; and

WHEREAS, the quality of the Plant's discharges into the Susquehanna River and Chesapeake Bay Watershed are in jeopardy of being negatively impacted, which conditions could negatively affect public and/or employee health, as well as the health of the local river environment; and

WHEREAS, the Binghamton-Johnson City Joint Sewage Board declares that the conditions discovered constitute an emergency and require immediate procurement and actions to repair/remedy so as to restore safe and proper operating conditions at the Plant as promptly as possible, which procurement cannot await competitive bidding processes to be completed; now, therefore, be it

RESOLVED, that in accordance with the Board's procurement policy and New York State law, the Board waives compliance with Board policy and State law with regard to

purchases of goods and public works contracts, but said waiver is limited to purchases, public works, and/or professional services related to analysis and repair of the affected electrical and control systems of the Plant, and actions appropriate to maintain the Plant's discharges in compliance with State law and applicable permits; and be it further

RESOLVED, that in accordance with Section 1(C) of the Board's Procurement Policy, the Plant Superintendent and Board Chairman shall take prudent action to secure the least total cost method of making purchases and engaging in public works, consistent with the nature of this emergency; and be it further

RESOLVED, that this resolution shall be effective through November 21, 2024.

Fiber-Optic Cable Issue

8/13/24

On 8/9/24 we were alerted to a conduit smoking in the BAF control room by a plant operator.

Upon investigation it was assumed that due to the ground being saturated by the Storm system that was in the area it may have been damaged during installation and the water was making the issue worse.

On Monday 8/12/24 There was 170 VAC present on the water soaked concrete foundation wall. At that time we assumed the duct-bank feeding the building may be damaged and causing arcing between the 480 feeders and the fiber-optic cable.

The electrical engineer had brought in a camera that could be fed through the conduit. We looked at construction photos taken by Jacobs engineering and Matco to determine what may be going on. We selected a feeder we thought could be causing the problem and opened that feeder known as Feeder 1. We then tested the concrete foundations and found no voltage present so we then fed the camera into the fiber-optic conduit and discovered what appears to be a threaded rod piercing the side of the PVC conduit and Fiber-Optic cable. The following photos show what we found.

This alone is not our biggest worry. Rather the fact that we are experiencing 170-221VAC on the concrete wall when water is present. This condition poses a potential electrocution risk to plant employees. This power source has been Identified as Feeder 1 to the Distribution Equipment in the BAF Blower room. If this feeder goes down, we will be unable to meet the permit for BOD, TN, Ammonia and Phosphorous removal. Both feeders are necessary to run all equipment associated with backwashing and the oxygen demand of the CN filters during high flow. This also would impact the Chesapeake Bay TMDLs. I am sure everyone realizes not meeting the permit is absolutely, not an option.

We have reached out to Matco Electric and the owner Mark Freije and Devin Ashman arrived at the plant withing a few minutes. We explained our situation and once again Matco has offered to provide a budget price to re-feed the equipment using a spare conduit in the duct bank and run new fiber-optic cable as a back up, in case the remaining cable fails.

In light of the safety and permit concerns I would ask the board to declare an emergency which would allow us to engage with Matco electric to provide a safe solution to this issue in a timely fashion.

PRO-HOUSING LEGISLATION

Bulk Requirements

- Decrease minimum lot size in all districts where housing is permitted. This would facilitate subdividing lots to be able to build more housing.
- Increase allowable lot coverage in all districts where housing is permitted. This would allow the construction of larger buildings and facilitate subdividing lots to be able to build more housing.
- Increase allowable height in R-3 and commercial districts.
- Simplify and decrease setbacks in the R-3 and commercial districts.
- Allow planning staff to reduce bulk requirements administratively for 1-3 unit dwellings. This would allow builders/property owners to avoid going to the Zoning Board for relief when building houses.

Parking

- Eliminate parking requirement for senior housing
- Eliminate parking requirement for affordable housing.
- Reduce parking requirement to 1 space per unit for units with up to 4 bedrooms. Keep existing higher requirement for units with 5 or more beds and congregate living.
- Allow Planning Commission to reduce parking requirements by up to 75% when appropriate.

Land Use and Rezoning

- Lessen restrictions for the construction of attached townhouses. Allow up to 3 townhouses (each on their own lot) in the R-1. Allow up to 6 in the R-2. Both would be subject to a special use permit and Planning Commission approval. Make up to 4 townhouses permitted by right in the R-3.
- Allow condominiums in the R-1 and R-2 districts
- Clarify where Accessory Dwelling Units (ADUs) are allowed
- Selectively expand R-3 where high density already exists. This would make "grandfathered" apartment buildings conforming, allowing them to add units. The following blocks would be rezoned from R-2 to R-3:
 - Chestnut St between Main St and College St
 - 26-33.5 Griswold St (both sides)
 - 40-52 Griswold St (even #'s only)
